

HOW TO PHOTOGRAPH YOUR EQUIPMENT FOR **OUR EQUIPMENT AUCTIONS**

We want to make sure potential buyers see your equipment in the most in-depth way possible while selling it online and in-person.

See the information below on how to photograph your machine for our auctions.

1

Make sure to start with a good advertising photo. Always hold your phone horizontally for the best picture!

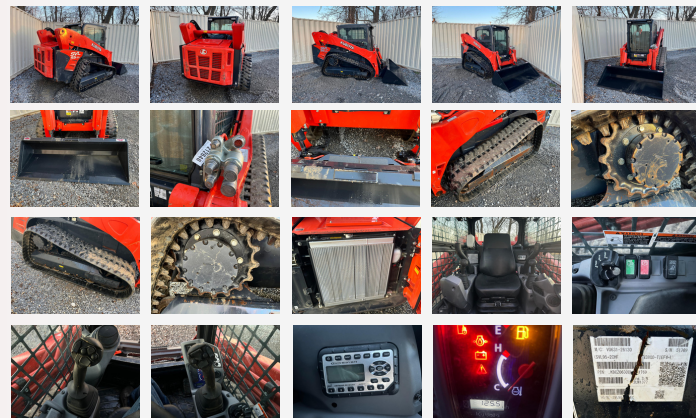

Then, walk around your machine - taking pictures at every angle.

2

Take photos of important selling features -

Hours, Controls, Engine, Inside the Cab, etc.

3

After the photographs are taken, be sure to send us as much information on your machine as possible!
